

Product information - Balconies

Taunton Fabrications can provide a single one off Juliette as part of the metalwork package through to providing complicated free standing structures, which are often installed as the construction progresses. This enables the contractor to order both the structure and balustrade from one supplier, which in turn ensures there are fewer interfaces between trades, and because we consider the balustrade and decking at the initial design stage means we eliminate problems that can occur at later stages of construction. With the structures installed we can then be called in to fit the balustrade to suit the contractors program.

> Self supporting galvanized and site painted structures with shaped profile balusters and powder coated perforated infill panels with central curved glass panels

>> Powdercoated balustrade with stainless steel handrails and glass infill panels

>>> Self supporting site painted structures with shaped profile balusters horizontal infill bars and glass infill panels.
