

Specification sheet - Glass balustrades

Clients and contractors often incorporate glass within the architectural metalwork package and because we are one of the largest providers of glass balustrades in the south we have a considerable knowledge and understanding of design and installation, all of our glass is backed up by structural calculations and if required finite element analysis to ensure structural integrity, we can also provide glass with screen printed, acid etched and fritted patterning to your exact requirements.

> 19mm clear toughened and heat-soaked, top landing in 36mm laminated toughened and heat-soaked.
